

Standard Secondary Chemistry Curriculum

Subject Code: CHEM-10 | Official Academic Curriculum

Verified learning outcomes and required chapter competencies for students.

Chapter 1: Chemical Reactions and Equations

- Balanced chemical equations
- Combination decomposition displacement
- Double displacement reactions
- Oxidation reduction and rancidity

Chapter 2: Acids, Bases and Salts

- Chemical properties with metals indicators
- pH scale and universal indicator
- Salts sodium hydroxide bleaching powder
- Baking soda washing soda plaster of paris

Chapter 3: Metals and Non-Metals

- Physical and chemical properties of metals
- Reactivity series and ionic compounds
- Occurrence and extraction of metals
- Corrosion prevention methods

Chapter 4: Carbon and its Compounds

- Covalent bonding and tetravalency of carbon
- Homologous series and functional groups
- Combustion oxidation addition substitution
- Ethanol and ethanoic acid properties

Chapter 5: Periodic Classification of Elements

- Dobereiner triads Newlands octaves
- Mendeleev periodic table achievements
- Modern periodic table trends valency size
